WORK EXPERIENCE

Scotiabank — **Toronto, Canada**
AI Product Manager — *Aug 2026 to Present*

- Delivered RPA automations and LLM workflows within banking infrastructure, reducing manual processing and contributing to operational expense reductions exceeding $20M.
- Led prompt engineering and RAG experiments across retrieval context and response generation, improving task success by 46% and reducing hallucinations by 76%.
- Defined LLM evaluation criteria for factual accuracy, hallucinations, edge cases, and model drift, improving response quality by 68% and supporting production readiness.
- Specified agentic workflow orchestration, RAG requirements, safety guardrails, and data governance controls for production delivery in a banking environment.

Ontario Centre of Innovation — **Toronto, Canada**
Technical Product Manager — *Dec 2022 to Mar 2026*

- Redesigned grant intake and review workflows through automation and user research, reducing turnaround time by 40% and tripling annual processing capacity.
- Shipped an AI chatbot for program Q&A and submission guidance, increasing engagement by 25% and grant and event submission completions by 15%.
- Led API integrations and backend data flows for SugarCRM and SugarConnect, eliminating manual data handoffs across eight teams.
- Owned a roadmap across three platform workstreams, translating quarterly priorities into delivery plans with engineering, design, and executive stakeholders.
- Used Mixpanel, Hotjar, and user research to analyze funnel dropoffs and prioritize workflow changes, reducing low value feature work by 20%.

Amazon Web Services — **Toronto, Canada**
Software Development Engineer — *Sep 2021 to Dec 2022*

- Partnered with product, UX, and ML teams on 12 major platform releases per year, reducing feature cycle time by 30%.
- Developed identity microservices and API interfaces for account creation and system integration on a platform processing over 10 million daily authentication requests.
- Coordinated release management, security compliance gates, and quality assurance across identity services, balancing platform reliability with delivery timelines.
- Defined service success metrics and monitored KPIs across more than five identity workstreams to support release prioritization and executive roadmap reporting.

NCR Corporation — **Hyderabad, India**
Software Developer — *Apr 2018 to Aug 2019*

CERTIFICATIONS AND PUBLICATION

Professional Scrum Product Owner I (PSPO I) | Scrum.org — *Sep 2026*
Project Management Professional (PMP) | PMI — *July 2024*
Product Manager Certification | BrainStation — *Oct 2022*
Acoustic Event Detection using Graph Signals | IEEE TENCON — *Dec 2017*

EDUCATION

University of Regina — **Regina, Canada**
Master of Science in Computer Science — *May 2021*

GITAM University — **Visakhapatnam, India**
Bachelor of Science in Computer Science — *May 2018*

TECHNICAL SKILLS

Product: User research, Product requirements, Roadmaps, Prioritization, Stakeholder alignment, Agile, Scrum, Jira, Asana, Confluence, Figma, Miro, Productboard
AI: LLMs, RAG, Prompt engineering, Agentic workflows, LLM evaluation, Hallucination analysis, Edge case analysis, Model drift, Guardrails, RPA
Data: SQL, Mixpanel, Hotjar, Tableau, Power BI, A/B testing, Funnel analysis, FHIR fundamentals
Engineering: Java, Python, REST APIs, Microservices, OAuth2/OIDC, AWS, Azure, CI/CD, Kubernetes, Postman
